## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 38-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are indefinite because the scope of the phrase "about" is unknown.

See comments below.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-5, 7-15, 18, 20-22, 27, 28, 31, 33 and 37-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuji in view of applicants' admissions for the reason set forth in the last Office action.

Claims 16-17, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuji in view of applicants' admissions and in further view of (pages 1-3 of instant application)

Art Unit: 1761

and in further view of Ebara (JP Pat. No. 52122281) for the reasons set forth in the last Office Action.

Claims 26, 29, 30, 32 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuji in view of applicants' admissions and in further view of Bolay *et al.* (Jnl. of Colloid and Interface Sci.)(hereinafter "Bolay") instant application)(hereinafter Bolay) for the reasons set forth in the last Office Action.

### ***Response to Arguments***

Applicants' arguments filed 09/10/03 have been fully considered but they are not persuasive.

Applicants argue that the one of ordinary skill in the art reading the present application has a knowledge of enzymes and an understanding of the crystalline:soluble cellulase activity ratio. Further, they state that the instant application contains scores of data points and that these provide scope to the term "about." With respect to said ratio, the term about is limited to those values found in the tables of the specification.

With respect to any claims reciting a pore size in combination with the term "about," applicant has provided no guidance and therefore those claims remain rejected.

With regard to the prior art rejections, applicants argue that the prior art does not state that other enzymes are excluded. It appears that applicants are requiring the prior art to not only teach how to perform a process, but also to disclose every possible way not to perform the process. When the prior art states that cellulase can be used by itself, those of ordinary skill in the art would take this as meaning that only cellulase is used.

Art Unit: 1761

Applicants are correct in asserting that their admissions do not anticipate the claimed invention. In response to applicants' arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

It is again noted that the crystalline:soluble cellulase activity ratio limitation is well known. Again, applicants failed to seasonably traverse this statement.

Ebara was not cited to teach the sole use of cellulase. Further, it is considered that those in the filtration cleaning art would look to any industry that cleans filters. If those in the brewing art had the Ebara reference in front of them they would apply the teaching.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
